

# COVID-19 in Virginia: Vaccine Summary

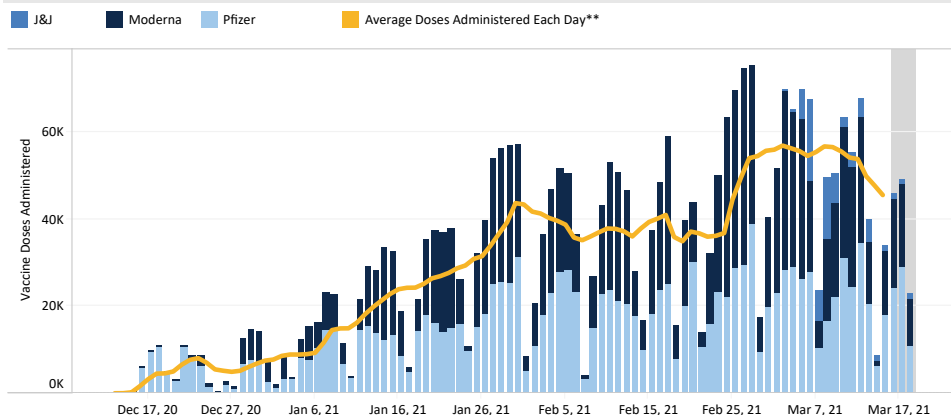

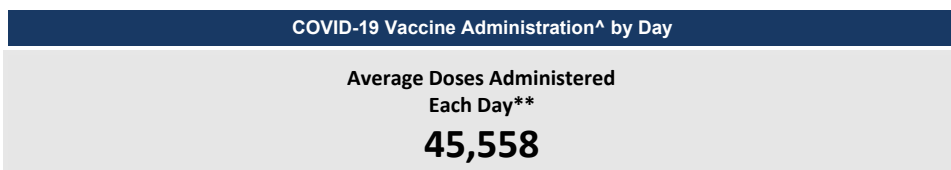

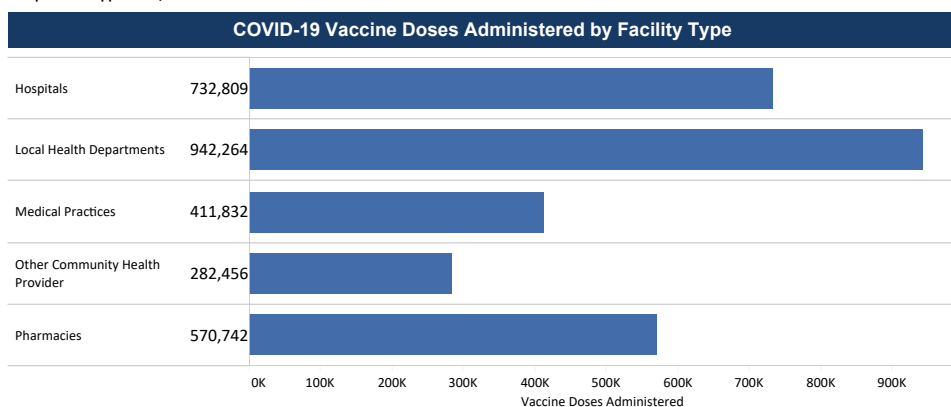

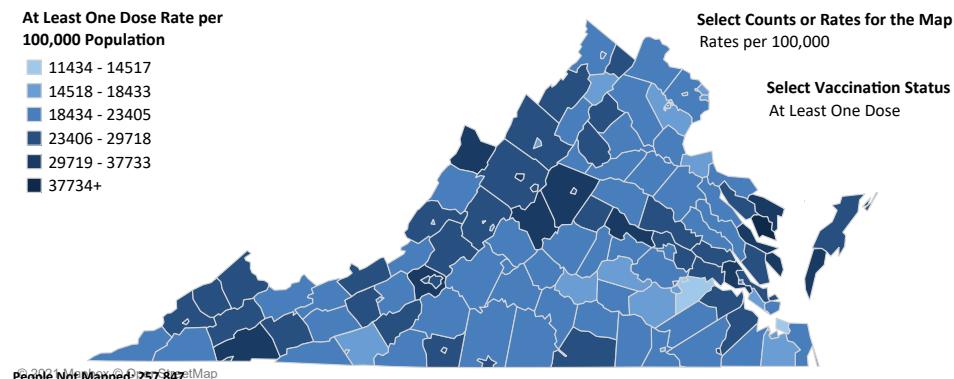

Dashboard Updated: 3/19/2021

## COVID-19 Vaccinations in Virginia

Total Doses Administered	People Vaccinated with at Least One Dose*	People Fully Vaccinated	% of the Population Vaccinated with at Least One Dose
<b>2,940,103</b>	<b>1,940,323</b>	<b>1,075,770</b>	<b>22.7%</b>

\* Includes people vaccinated with 1 or 2 doses of a 2-dose vaccine, including doses administered through the Federal CDC Pharmacy Partnership for Long Term Care Facilities.

## People Vaccinated by Locality of Residence and Vaccination Status - Rate per 100,000 Population

\*\*The average doses administered each day takes the last 7 days of daily doses given, adds them up, and divides that number by 7. This is useful to get a clear picture of the data while taking into account reporting delays.

^Vaccine administrations may take up to 72 hours to be reported, shown by gray shaded area on graph.
