

STATE PROFILE REPORT
01.31.2021

VIRGINIA

This week's State Profile Report makes data for each state available in the same format that has been provided to state officials in previous weeks. The weekly State Profile Reports are currently under review. The format and content may change in coming reports.

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to COVID-Data-RFI@hhs.gov.

COVID-19

VIRGINIA

STATE PROFILE REPORT | 01.31.2021

	STATE	STATE, % CHANGE FROM PREVIOUS WEEK	FEMA/HHS REGION	UNITED STATES		
NEW COVID-19 CASES (RATE PER 100,000)	33,566 (393)	-15%	97,924 (317)	1,075,727 (324)		
VIRAL (RT-PCR) LAB TEST POSITIVITY RATE	11.7%	-2.3%*	8.8%	8.8%		
TOTAL VIRAL (RT-PCR) LAB TESTS (TESTS PER 100,000)	210,313** (2,464**)	-13%**	1,028,428** (3,333**)	10,241,016** (3,085**)		
COVID-19 DEATHS (RATE PER 100,000)	370 (4.3)	-1%	2,022 (6.6)	22,555 (6.8)		
SNFs WITH ≥1 NEW RESIDENT COVID-19 CASE	30%†	-3%*	29%	23%		
SNFs WITH ≥1 NEW STAFF COVID-19 CASE	40%†	-16%*	43%	37%		
SNFs WITH ≥1 NEW RESIDENT COVID-19 DEATH	18%†	-7%*	18%	14%

CONFIRMED NEW COVID-19 HOSPITAL ADMISSIONS (RATE PER 100 BEDS)	1,808 (11)	-11% (-11%)	7,176 (11)	82,072 (11)		
NUMBER OF HOSPITALS WITH SUPPLY SHORTAGES (PERCENT)	6 (7%)	+20%	73 (19%)	1,073 (21%)		
NUMBER OF HOSPITALS WITH STAFF SHORTAGES (PERCENT)	20 (23%)	-17%	70 (18%)	877 (17%)		
COVID-19 VACCINE SUMMARY	DOSES DISTRIBUTED		1ST DOSE ADMINISTERED	FULL COURSE ADMINISTERED		
	TOTAL	RATE PER 100,000	TOTAL	PERCENT OF POPULATION	TOTAL	PERCENT OF POPULATION
	1,232,350	14,437	687,883	8.1%	118,612	1.4%

* Indicates absolute change in percentage points.

** Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

† 93% of facilities reported during the most current week.

DATA SOURCES and METHODS

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.**Cases and Deaths:** State values are aggregated data provided by the states to the CDC. Data is through 1/29/2021; previous week is 1/16 - 1/22.**Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data through 1/27/2021. Previous week is 1/14 - 1/20.**SNFs:** Skilled nursing facilities. National Healthcare Safety Network. Data is through 1/24/2020, previous week is 1/11-1/17.**Admissions:** Unified Hospitals Dataset in HHS Protect.**Shortages:** Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 1/29/2021.**Vaccinations:** [CDC COVID Data Tracker](#). Data includes both the Moderna and Pfizer BioNTech COVID-19 vaccines and reflects current data available as of 13:11 EST on 01/31/2021. Data last updated 06:00 EST on 01/31/2021.**METHODS** – details available on last page of report

	2 ▲ (+1)	Blacksburg-Christiansburg Bluefield	13 ▲ (+4)	Warren Brunswick Fluvanna Richmond Greensville King William Radford City Grayson Lunenburg Madison Essex Middlesex
Change from previous week's alerts: ▲ Increase ■ Stable ▼ Decrease				

All Red Counties: Fairfax, Prince William, Virginia Beach City, Chesapeake City, Loudoun, Chesterfield, Henrico, Newport News City, Norfolk City, Hampton City, Stafford, Spotsylvania, Frederick, Bedford, Portsmouth City, Lynchburg City, Hanover, Suffolk City, Rockingham, Pittsylvania, Campbell, Petersburg City, Danville City, Augusta, York, Fauquier, Henry, Franklin, Washington, Amherst, Hopewell City, Halifax, Harrisonburg City, Manassas City, Prince George, Winchester City, Lee, Isle of Wight, Gloucester, Waynesboro City, Prince Edward, Dinwiddie, Accomack, Louisa, Page, Pulaski, King George, Botetourt, Fredericksburg City, Appomattox, Smyth, Nottoway, Buckingham, Wise, Wythe, Powhatan, Tazewell, Colonial Heights City, Carroll, Rockbridge, New Kent, Martinsville City, Sussex, Alleghany, Westmoreland, Clarke, Nelson, Russell, Poquoson City, Greene, Charlotte, Buchanan, Scott, Amelia, Patrick, Buena Vista City, Lancaster, Bristol City, Northampton, Floyd, Covington City, Emporia City, Charles City, Dickenson, Mathews, Rappahannock, Bland, Surry, King and Queen, Craig

All Orange Counties: Richmond City, Arlington, Alexandria City, Roanoke, James City, Roanoke City, Shenandoah, Culpeper, Salem City, Staunton City, Caroline, Orange, Mecklenburg, Goochland, Southampton, Giles, Franklin City, Northumberland, Cumberland, Manassas Park City, Williamsburg City

All Yellow Counties: Warren, Brunswick, Fluvanna, Richmond, Greensville, King William, Radford City, Grayson, Lunenburg, Madison, Essex, Middlesex, Falls Church City

* Localities with fewer than 10 cases last week have been excluded from these alerts.

Note: Lists of red, orange, and yellow localities are sorted by the number of new cases in the last 3 weeks, from highest to lowest. Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

DATA SOURCES and METHODS

Cases: CBSA and county values are calculated by aggregating county-level data from a CDC-managed dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 1/29/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data through 1/27/2021.

METHODS – details available on last page of report

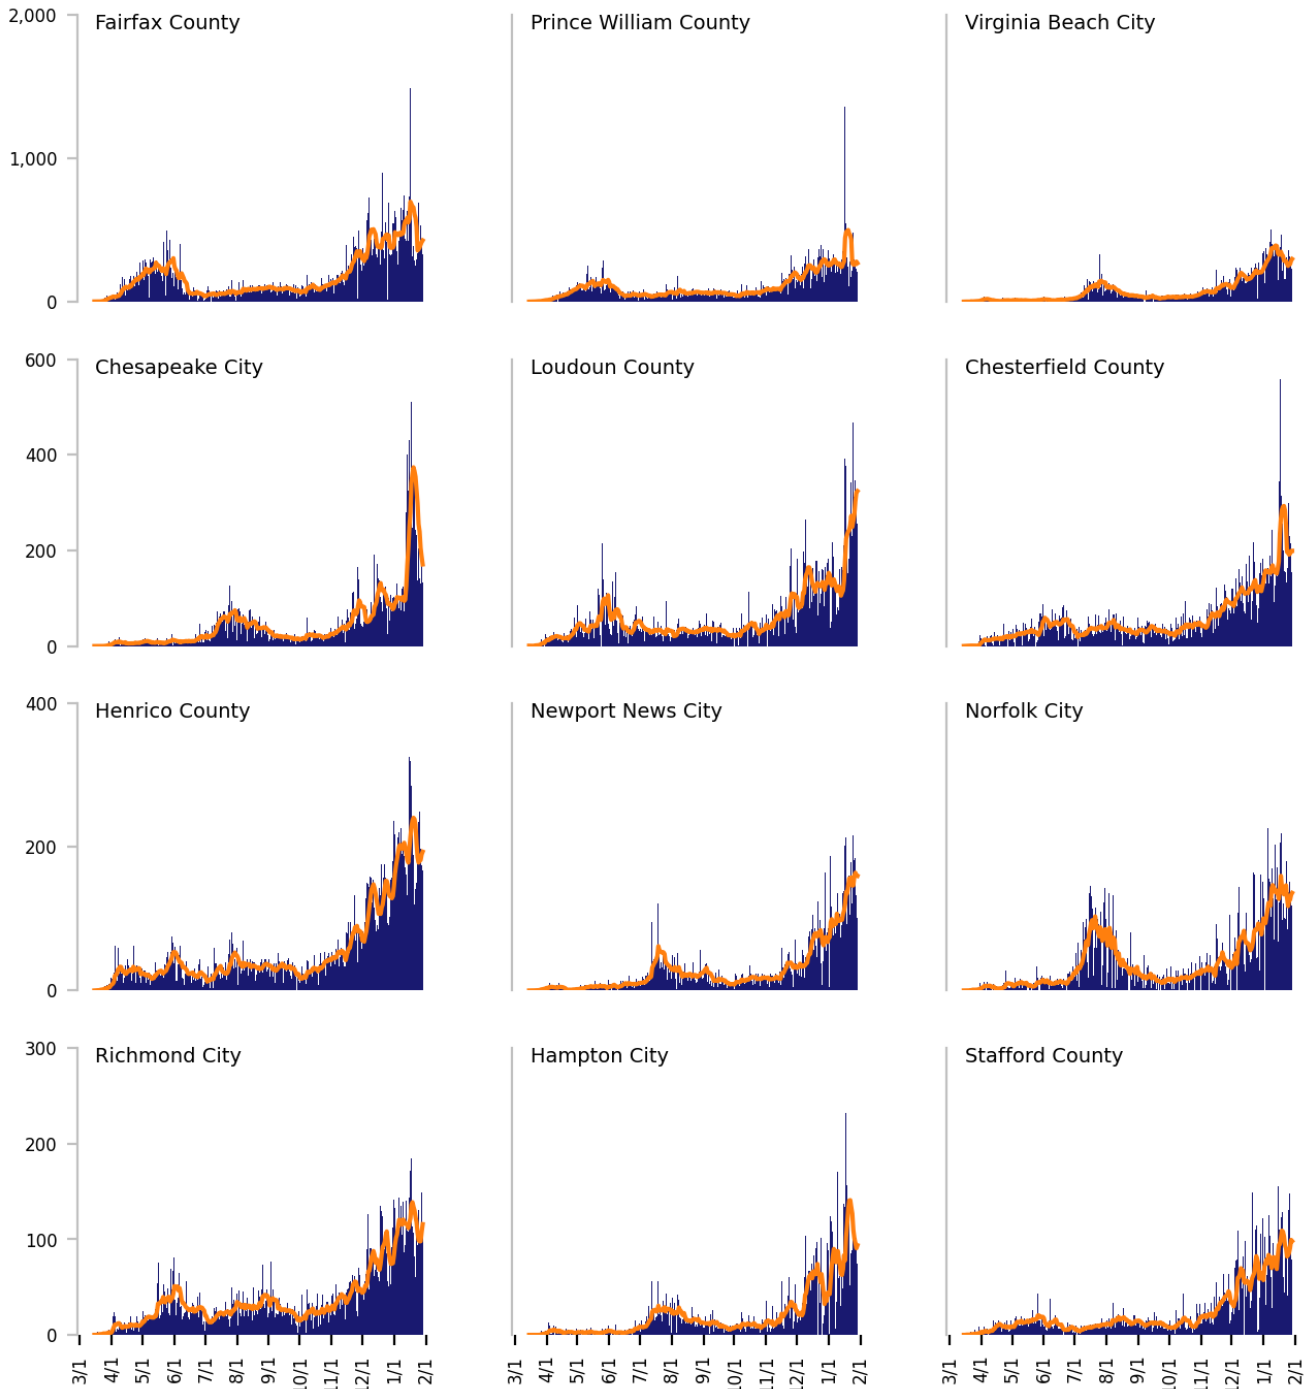

Top 12 counties based on number of new cases in the last 3 weeks

The scale is fixed per row based on the historical peak number of daily cases*

— Daily COVID-19 Cases (7-day average) ■ Daily COVID-19 Cases

TOTAL DAILY CASES

* The vertical scale of plots is fixed per row based on the historical peak number of daily cases; use caution when comparing visuals across different rows.

DATA SOURCES and METHODS

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 1/29/2021. Last 3 weeks is 1/9 - 1/29. Counties are listed in order of the number of cases in the last three weeks, from largest to smallest.

Change in percent of hospitals with supply/staff shortages	≤-10%	-9% – -5%	-4% – 0%	1% – 4%	5% – 9%		≥10%	

- Some dates may have incomplete data due to delays and/or differences in state reporting. Data may be backfilled over time, resulting in week-to-week changes. It is critical that states provide as up-to-date data as possible. Figures and values may also differ from state reports due to differing methodologies.
- Color threshold values are rounded before color classification.
- Cases and Deaths:** County-level data is from a CDC-managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. Data is as of 14:07 EST on 01/31/2021.
- Testing:** The data presented represent viral COVID-19 laboratory diagnostic and screening test (reverse transcription polymerase chain reaction, RT-PCR) results—not individual people—and exclude antibody and antigen tests, unless stated otherwise. CELR (COVID-19 Electronic Lab Reporting) state health department-reported data are used to describe county-level viral COVID-19 RT-PCR result totals when information is available on patients' county of residence or healthcare providers' practice location. HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs) are used otherwise. Because the data are deidentified, total RT-PCR tests are the number of tests performed, not the number of individuals tested. RT-PCR test positivity rate is the number of positive tests divided by the number of tests performed and resulted. Last week data are from 1/21 to 1/27; previous week data are from 1/14 to 1/20; the week one month before data are from 12/24 to 12/30. HHS Protect data is recent as of 13:01 EST on 01/31/2021. Testing data are inclusive of everything received and processed by the CELR system as of 19:00 EST on 01/30/2021.
- Hospitalizations:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. In addition, hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. The data presented represents raw data provided; we are working diligently with state liaisons to improve reporting consistency. Data is recent as of 12:49 EST on 01/31/2021.
- Hospital PPE:** Unified Hospitals Dataset in HHS Protect. This figure may differ from state data due to differences in hospital lists and reporting between federal and state systems. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is recent as of 14:13 EST on 01/31/2021.
- Skilled Nursing Facilities:** National Healthcare Safety Network (NHSN). Data report resident and staff cases independently. Quality checks are performed on data submitted to the NHSN. Data that fail these quality checks or appear inconsistent with surveillance protocols may be excluded from analyses. Data presented in this report are more recent than data publicly posted by CMS. Last week is 1/18-1/24, previous week is 1/11-1/17.
- County and Metro Area Color Categorizations**
 - Red Zone:** Those core-based statistical areas (CBSAs) and counties that during the last week reported both new cases at or above 101 per 100,000 population, and a lab test positivity result at or above 10.1%.
 - Orange Zone:** Those CBSAs and counties that during the last week reported both new cases between 51–100 per 100,000 population, and a lab test positivity result between 8.0–10.0%, or one of those two conditions and one condition qualifying as being in the “Red Zone.”
 - Yellow Zone:** Those CBSAs and counties that during the last week reported both new cases between 10–50 per 100,000 population, and a lab test positivity result between 5.0–7.9%, or one of those two conditions and one condition qualifying as being in the “Orange Zone” or “Red Zone.”
- Shortages:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Includes hospitals currently reporting a staffing shortage. Low supply is defined as a hospital reporting 0 or 1-3 days' supply, not able to obtain, or not able to maintain a 3-day supply of N95s, face masks, gloves, gowns, or eye protection. Data is recent as of 14:13 EST on 01/31/2021.
- Vaccinations:** [CDC COVID Data Tracker](#). Data includes both the Moderna and Pfizer BioNTech COVID-19 vaccines and reflects current data available as of 13:11 EST on 01/31/2021. Data last updated 06:00 EST on 01/31/2021.
