Date Updated (2)

Footnote

*Due to lag in testing data reporting, the most recent day with an available 7-day average percent positivity is 4/7/2021. This value is used from 4/7/2021 to present date. A data lag of 4 days (including current date) will occur on a daily basis. This allows for testing results to be received to ensure a stable calculation of the percent positivity metric.
