Date Updated

Date Updated

Footnote

*Due to lag in testing data reporting, the most recent day with an available 7-day average percent positivity is 2/1/2021. This value is used from 2/1/2021 to present date. A data lag of 4 days (including current date) will occur on a daily basis. This allows for testing results to be received to ensure a stable calculation of the percent positivity metric.

Stat.Cases Days Increase County

Cases have been decreasing for **24 days**. This exceeds the threshold of 14 days, so cases are considered to be **decreasing**.

Stat.Cases Days Increase County

Stat.HCW Days Increase County

The percent of cases in HCWs has been decreasing for **33 days**. This exceeds the threshold of 7 days, so cases in HCWs are considered to be **decreasing**.

Stat.HCW Days Increase County

Stat.Outbreaks Days Increase County

Outbreaks have been decreasing for **16 days**. This exceeds the threshold of 14 days, so outbreaks are considered to be **decreasing**.

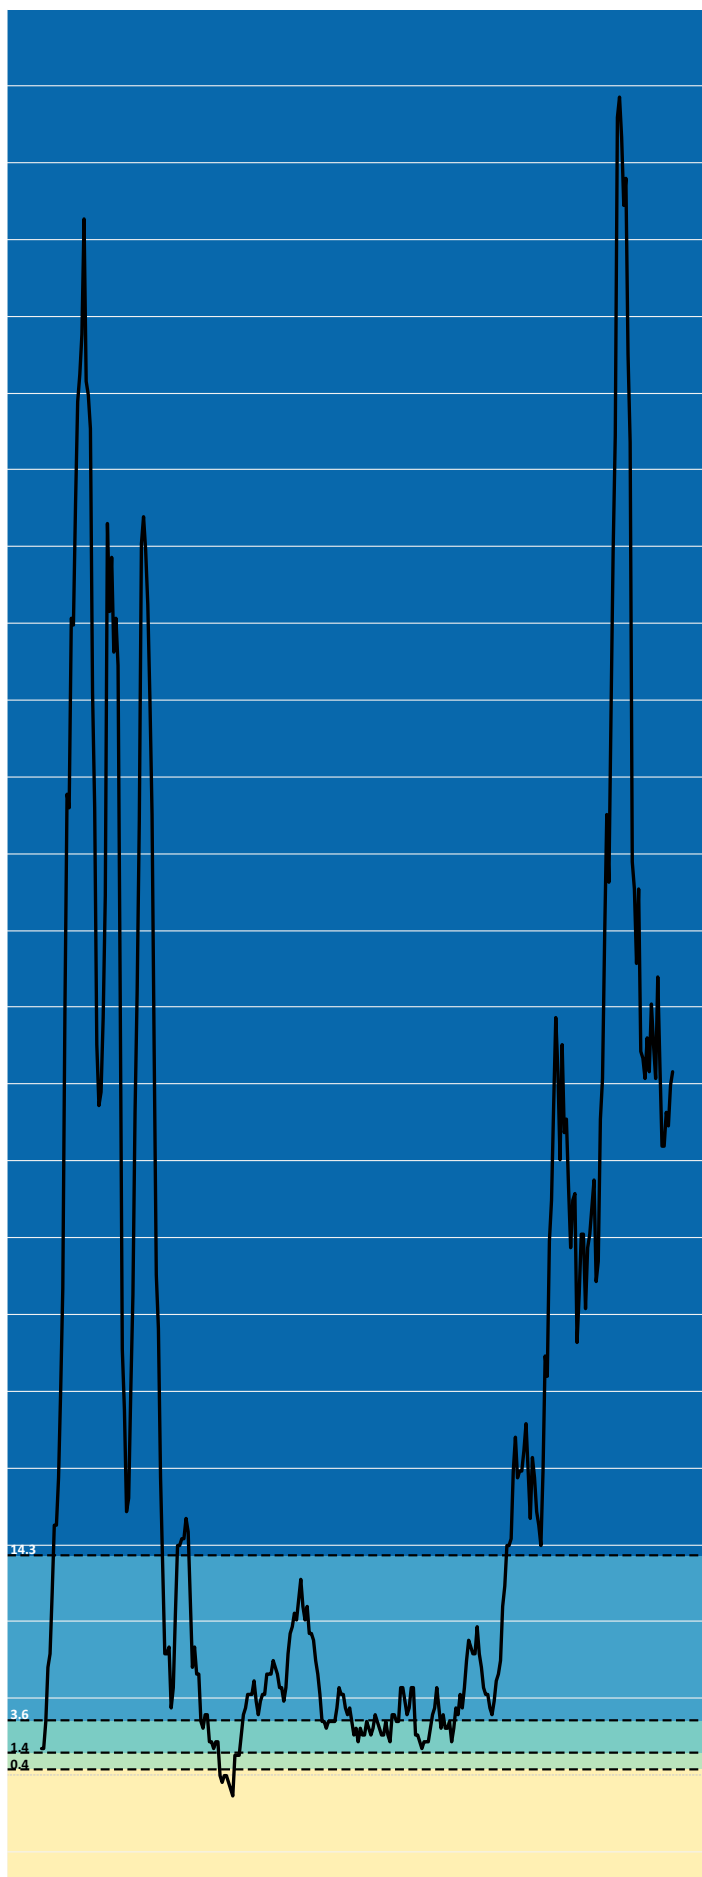

Stat.Outbreaks Days Increase County

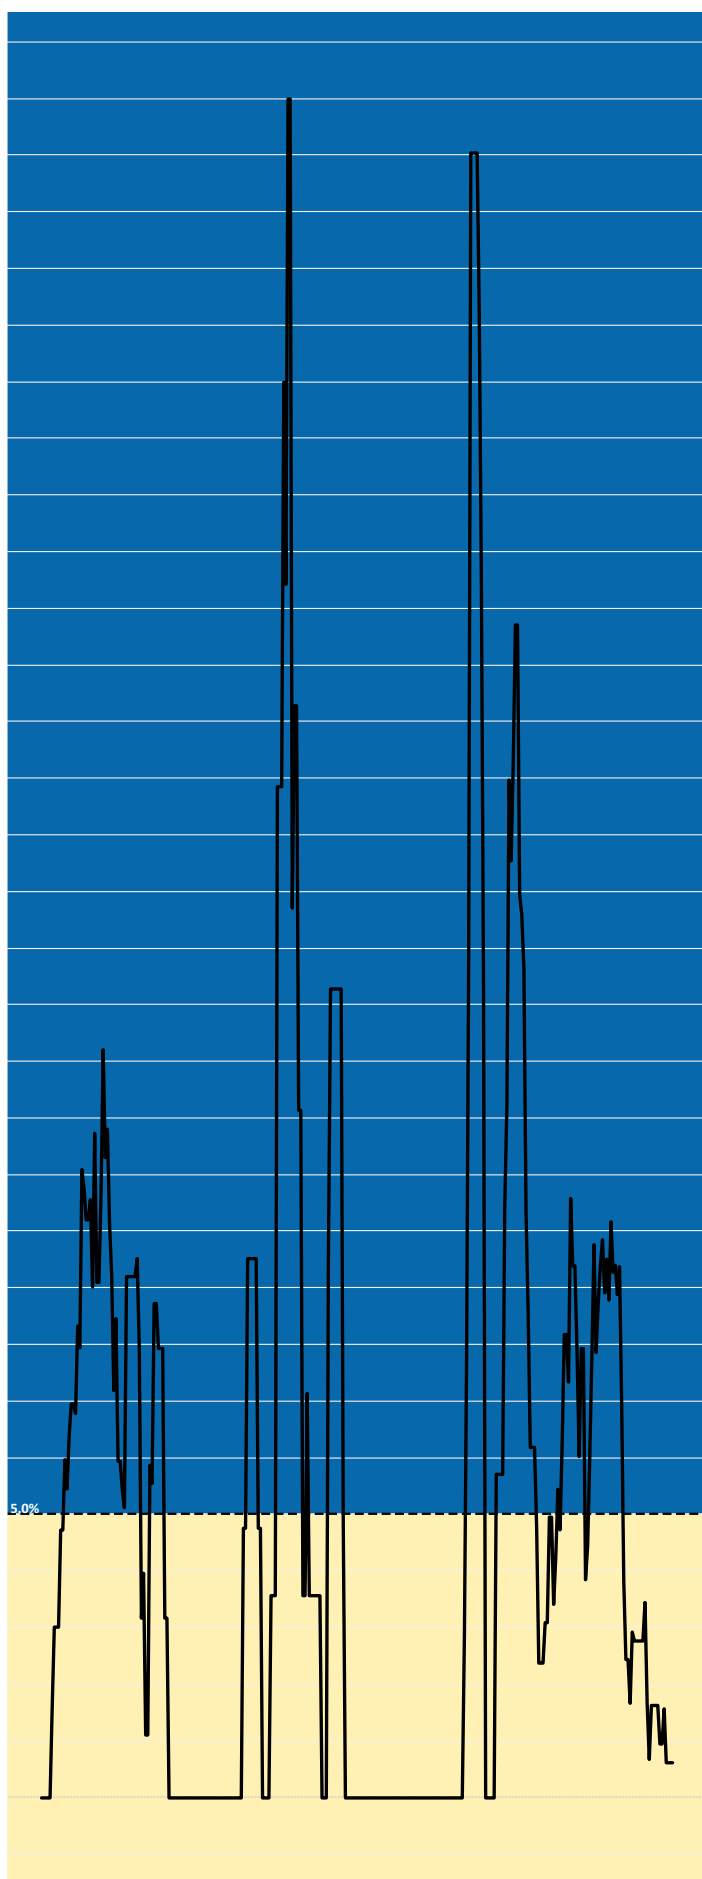

Stat.Percent Pos Days Increase County

Percent positivity has been increasing for **5 days**. This does not exceed the threshold of 14 days, so percent positivity is considered to be **fluctuating**.
