Category	Questions	Residents	Staff and/or personnel
Testing	Average Time to Receive Test Results During Past Two Weeks		
	Able to Test or Obtain Resources to Test Within Next 7 Days	99.25%	99.62%
	In-House Point-of-Care Test Machine	100.00%	100.00%
	Has Facility Performed Tests Since Last Report	100.00%	100.00%
When Does Testing Occur	New Signs or Symptoms		
	Asymptomatic in a Unit or Section After ..		
	Asymptomatic Facility-Wide After a Ne..		
	Asymptomatic Without Known Exposure..		
Reason for not Testing	Lack of Access to Laboratory	100.0%	100.0%
	Lack of Access to Trained Personnel	100.0%	100.0%
	Lack of PPE for Personnel	100.0%	100.0%
	Lack of Supplies	100.0%	100.0%
	Uncertainty About Reimbursement	100.0%	100.0%
Any Current Supply of		Shortages of	
Eye Protection	98.87%	Aides	91.70%
Gloves	99.25%	Clinical Staff	97.36%
Gowns	96.23%	Nursing Staff	92.45%
Hand Sanitizer	99.25%	Other Staff	96.23%
N95 Masks	96.60%		
Surgical Masks	96.60%		

-Data is derived from the Nursing Home COVID-19 Public File, the most comprehensive and timely set of data available, as captured by the CDC and reported out by the Centers for Medicare & Medicaid Services (CMS).

-Results calculated using "same store" methodology. This methodology includes only those facilities that have reported in both comparison time periods (week-over-week). Facilities reporting in one but not both weeks are removed from the analysis. Total count using same-store metrics will vary from total geographic count provided directly in CDC data.

-Only those facilities that submitted data for the reporting week and passed the CDC's Quality Assurance checks, are included. Additionally, facilities that did not provide total number of beds or occupied beds or where occupied number of beds were greater than total number of beds were excluded.
