People Vaccinated by Locality of Residence and Vaccination Status - Rate per 100,000 Population

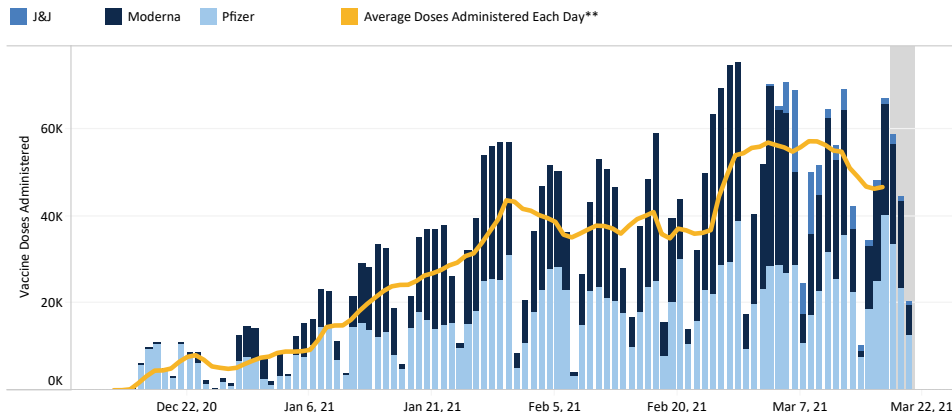

COVID-19 Vaccine Doses Administered by Facility Type

COVID-19 Vaccine Administration^ by Day

Average Doses Administered
Each Day**

46,772

**The average doses administered each day takes the last 7 days of daily doses given, adds them up, and divides that number by 7. This is useful to get a clear picture of the data while taking into account reporting delays.

^Vaccine administrations may take up to 72 hours to be reported, shown by gray shaded area on graph.
