

SARS-COV-2 Testing at Commercial and Private Laboratories

Updated: October 19, 2020

The below table lists commercial and private laboratories with SARS-COV-2 testing capabilities known to VDH as of October 19, 2020. This list is intended to inform clinicians on the various commercial labs available to them and does not constitute endorsement by VDH. This list does not include hospital laboratories that are performing SARS-CoV-2 testing. At this time, VDH is not aware of any commercial or private laboratory using antigen tests that can identify SARS-COV-2. Clinicians should use their judgment to determine if a patient has [signs and symptoms compatible with COVID-19](#) and whether the patient should be tested. For VDH recommendations about high priority and priority testing, see [here](#). Please refer to laboratory specific information related to ordering, specimen collection, and pricing.
