COMPOSITE SCORES

Composite Burden Score by Day

Composite Trend Score by Day

The composite burden and trend scores are calculated each day as the sum of weighted indicators for each individual metric.

Individual Metric Values, Weights, and Scores, 3/5/2021

Individual Metric	Burden Indi..	Burden Wei..	Burden Score	Trend Indic..	Trend Weig..	Trend Score
Cases						
Percent Positivity						
Outbreaks						
HC Workers						
ED Visits						
ICU Hospitalizati..						
Hospital Beds						
PPE						
Composite Scores						

The weighted indicators are calculated for each individual metric by multiplying the indicator value by the weight assigned to that individual metrics.

For more information on how the indicator values for each individual metric are determined, see the [Regional Metrics](#) tab.
