JMU data updated August 28th, 11:22am | VDH data updated August 28th 2020, 11:22am

8

JMU on-campus cases (1)(2)

162

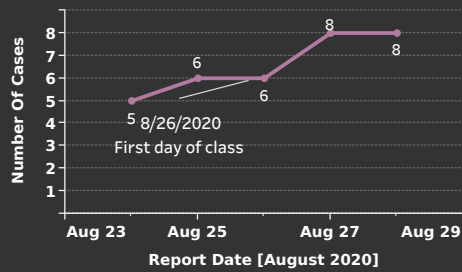

JMU self-reported cases (3)

3.24%

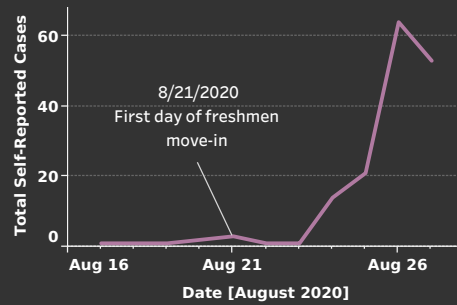

JMU health center positivity rate (4)

8/26/20 update from JMU: "JMU has been made aware of a **cluster of 11 positive cases**. All are students, affiliated with the same organization, and live off-campus." These cases are calculated as self-reported, not as on-campus cases.

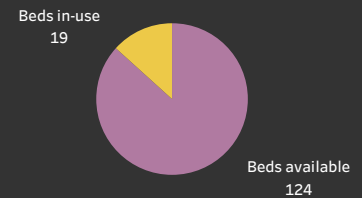

## JMU total on-campus positive cases-VDH (1)

## JMU new self-reported cases (3)

## Isolation beds currently in-use (3)

## JMU University Health Center testing

29

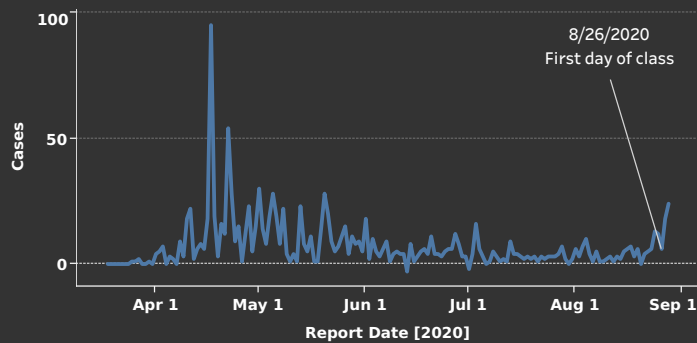

JMU health center reported total positive test results (3)

894

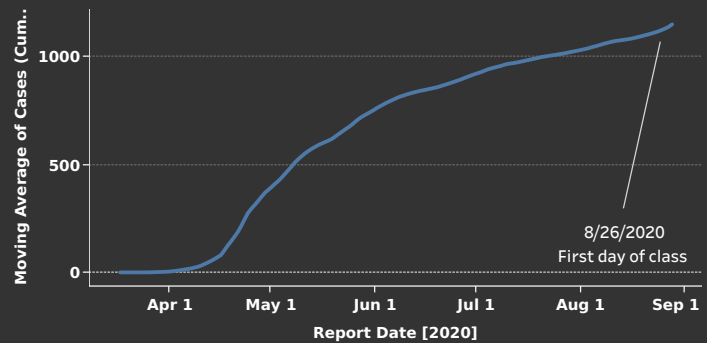

JMU health center reported total negative test results (3)

## Harrisonburg case count - VDH

### VDH daily reported case count - Harrisonburg

### VDH cumulative case count - Harrisonburg

(1) According to the Virginia Department of Health, filtered by ZIP code 22807, which is exclusive to JMU. It is possible that this figure includes some self-reported cases, as the Virginia Department of Health records cases by where the individual lives, not necessarily where the individual is tested. The Breeze has reached out to VDH for confirmation on data reporting and is awaiting response.

(2) Due to reporting constraints, this number is not representative of the JMU student population as it does not include the majority of off-campus students who have tested positive.

(3) According to the JMU official COVID-19 dashboard.
