Date Updated

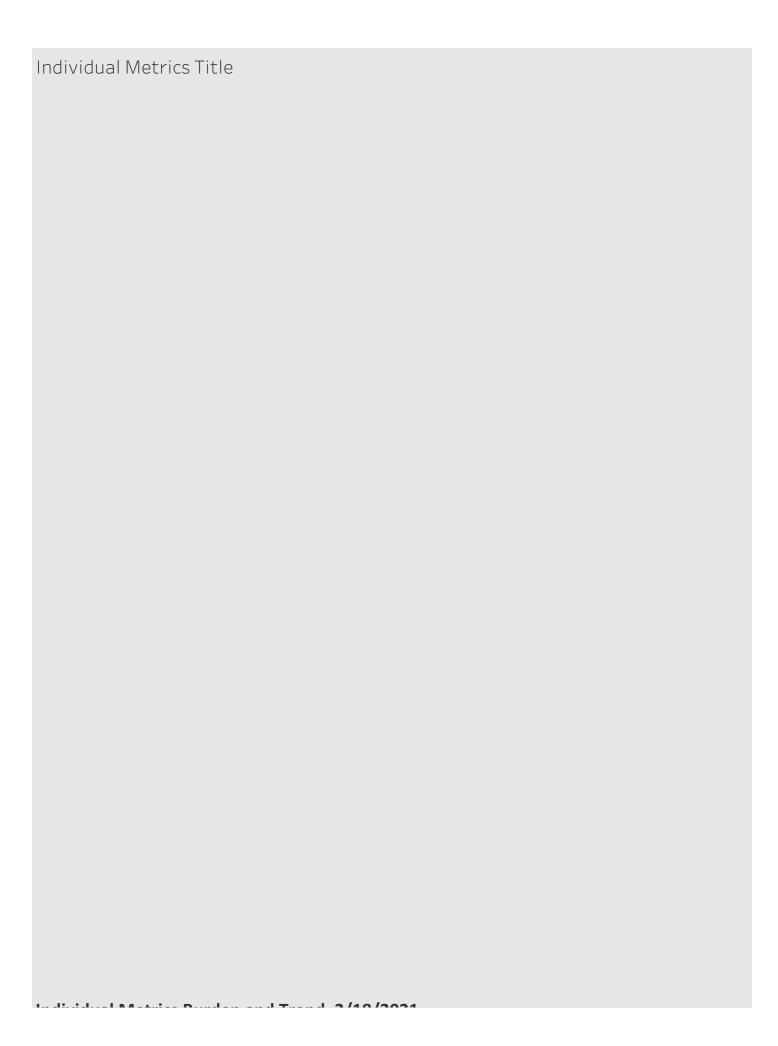

Last Updated: 2/18/2021

Date Updated

ootnote	

# Footnote \*Due to lag in testing data reporting, the most recent day with an available 7-day average percent positivity is 2/14/2021. This value is used from 2/14/2021 to present date. A data lag of 4 days (including current date) will occur on a daily basis. This allows for testing results to be received to ensure a stable calculation of the percent positivity metric.
